ANTICORROSIVE PRIMER**

**Contains a REVOLUTIONARY NEW PIGMENT
that STOPS COSTLY CORROSION!**

**saves rusted metal,
preserves new metal . . .
indoors and out!**

- Penetrates deep down to the bare metal.
- Forces out moisture and air.
- Forms a tough, tenacious, rust inhibitive surface.
- Apply directly over rust after cleaning off loose scaling rust or old paint with a wire brush.
- Dries overnight to a smooth surface, ideal for re-coating.

NOTE: For severely rusted metal surfaces, use MAB No. 8288 Clear Rust Treatment before priming. This chemically treated solution, due to the action of its rust de-activating ingredients, inhibits the formation and growth of rust.
